

★ARGIES★

Argies – Acoustic Technical Rider

Hello there, here a little Technical information about what's required by „ARGIES” for an acoustic show. We are easy going and we get along with everything after all these years. We only like to know with what we have to come along. So please inform us about your gear in the venue. (in case it's not known yet).

ARGIES will be traveling with own FOH – Engineer for most part of the tour, but we are going to need anyways a house Engineer who knows well the technical installations in the venue

We need a 24 Input Channel Mixer with at least 3- Band- EQ per channel,
2 x Reverb FX devices
1 x Tap Delay
Outboard gear is listed as follow in the input list.
4 separated Aux ways for wedges. Split into 5 Wedges.
4 x 31 Bands Graphic EQ (1 for each wedge).
